

**BOARD OF EDUCATION
School District #33 (Chilliwack)**

**229
POLICY
Trustee Electronic Communication Support**

The Board of Education believes that for trustees to fulfill their responsibilities and obligations they require current electronic communication with each other and the educational leaders in the district.

1. The school district shall provide trustees with a laptop computer and necessary supplies. Other equipment needs will require Board approval through the budget process.
2. Equipment provided to trustees will remain the property of the school district and will be returned to the school district upon completion of the trustee's term of office.
3. All trustee computers will be supplied with a complete suite of productivity tools, and will be preconfigured to securely attach to the school district's wireless networks and computing services. The installation, set-up, maintenance and operational costs are the responsibility of the school district. In order to ensure that software is compatible with the standard suites and anti-virus software, additional software can only be installed with the Director of Instruction (Technology) approval.
4. Trustees shall receive \$600.00 per year to help offset external communication fees associated with their responsibilities.
