

**BOARD OF EDUCATION
School District #33 (Chilliwack)**

525

POLICY

Support for Student Education Programs by Outside Agencies and Certified Professionals

The Board supports the Inter-Ministerial protocols between government Ministries for the collaborative provision of services for students by public health nurses, physical and occupational therapists, and other appropriate certified professionals.

As well, the Board values and welcomes the input of outside certified professionals to provide support, advice and assistance to the classroom teacher and the school based team who work with the parents/guardians to develop the student Individual Education Plan (IEP).

Normally, outside private professionals do not provide direct service to students within the school.
