BioHazard Spill Cleanup

EXECUTION

Larger Spills:

Gently sprinkle enough absorbent to contain and absorb all fluid.

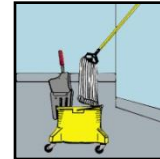

Use brush and dust pan to pick up contaminated powder. Place in garbage bag and dispose of in biohazard waste container.

Disinfect the area with Mop using **Cleaner / Disinfectant**

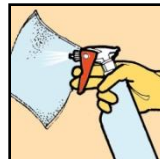

Empty mop water into slop sink; use **Cleaner / Disinfectant** to disinfect all equipment.

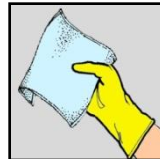

Smaller Spills:

Spray area with **Cleaner / Disinfectant** from spray bottle .

Wipe the area with disposable cleaning cloths.

Collect the wiper and soil and discard in a biohazard waste container.

Spray again and allow air to dry.

PRIDE

No stain.

Contaminated waste is properly disposed.
