

POLICY 270 COMMUNITY USE OF FACILITIES

Purpose

Chilliwack School District (“District”) facilities and sites are primarily used to support the education of public school students. When schools are not in use, the Board of Education (the “Board”) may allow community groups to use District facilities. This helps create more opportunities and activities for students and the community while prioritizing student learning.

Guidelines

The Board has established the following guidelines related to community use of District facilities:

1. Delivery of public education services to the District’s students shall have priority.
2. Fees will be charged to cover the costs of providing facilities for community use.
3. Facilities will not be used by groups or organizations whose activities do not align with the District’s values.
4. Schools will not be used for any election campaign purposes.
5. All users of the Board’s facilities will be treated equitably and fairly.
